ACH Changes Are Coming

It will soon be possible for ACH debits (electronic withdrawals) to post to your account the same day you authorize them. Funds should be in your account before you authorize a payment in order to avoid overdrafts.

Beginning 9/15/2017, ACH debits and credits will be able to post the same day they are created.

This affects ALL financial institutions.

The difference you will see is that ACH credits and debits (including checks converted to ACH)

May be posted throughout the day instead of once per day. This means that payments you make using your account number could possibly post the same day you authorize them.
